Frontend Documentation

<u>How to start and run our front-end:</u>

npm install --legacy-peer-deps
npm start

<u>File Structure</u>
The 'components' folder in the 'src' folder contains each webpage's .jsx file. In future sprints, we will add their corresponding .css files and separate them into their respective folders. We have begun this process as of Sprint 2.

<u>Pages</u>
home.jsx
Returns a Home page that users will visit when they log in to or register their account. In future sprints, the Home page will introduce our product (for users who are not logged in) or act as a dashboard for logged in users.

login.jsx
Returns a Login page that users can use to log in and access their profile in the system.

search.jsx
Returns a Search page in which a user can search for an activity and be presented with search results for the specified activity.

register.jsx
Returns a Register page that users can use to register onto the system.

homepage.jsx
Returns a Home page that users will visit when they are not logged in.

Account_information.jsx

Returns a Profile page where the user can see their account information.

Chat.jsx

Returns a chat page in which users can chat with other users and groups.

Contact_us.jsx

Returns a page where users can send feedback or questions to the website owners

Edit_info.jsx

Returns a page where the user can edit their personal information

viewGroup.jsx

Returns a page that allows a user to see information about a created group

about_us.jsx

Returns a page that shows info about the website as well as the development team

faq.jsx

Returns a page with faq's as well as answers to them

account_info_authentication.jsx

Returns page prompting user for password to access account info

Chat_friend

Returns chat page to talk with a registered friend

Create_Group

Returns page to create a group for a certain activity

friend_list.jsx

Returns a page containing all of a user's friends

profile.jsx

Returns a page containing a user's profile info

user_search
Returns a page where a user can search for other users

viewGroup.jsx
Returns a page where a user can view info about a group
